

## She shouldn't be doing this

Up until a few months ago, 7-year-old Courtney could only get around by walking on her knees. Now, against all odds, she's walking tall. And more. Every day, Shriners Hospitals for Children treats kids like Courtney for orthopaedic problems, spinal cord injuries, burns and more. It's specialized care at no charge to the patient's family. And it's only possible with your donations. So please give, and help kids do what they otherwise couldn't. **Defy the odds. Donate to Shriners Hospitals for Children, and give kids a chance.**
